

**Table 1.** Summary of states’ policies on the sales of detached catalytic converters (CC). Required information in detailed sales records commonly includes identifying information of the seller (name, home address, copy of ID, photo/description), the vehicle the CC was removed from (year, make, model, VIN, license plate number, title, registration, proof of ownership), the CC itself (photo, description, unique stock number, signed statement that CC was legally obtained), and transaction details (amount paid, date, time, location). Electronic records are required to be submitted by the metal recycler (buyer) within a timeframe, ranging from 24 hours to 60 days after a sale. Blue circles indicate the presence of the requirement in the state’s statutes.

States	Statutes	Require keeping specific sale records	Require submission of electronic record	Require adding unique, permanent ID to CC	Buyer must be permitted
